

Release Notes for May 20, 2002

The following items have been migrated to Production for use by Agencies beginning on May 20, 2002.

- An additional option of “Not Applicable” was added to the Filling Position field. This value will be used when the filling position was blank in legacy.
- February/March/April production issues have been loaded into the online Help POC Tool. The old items have ticket numbers of less than 100. The more recently submitted tickets begin with ticket number 101.
- A modification was made to alleviate the problem of having to use the action of HIR on some NOA’s to set the Hire NTE date. This change will allow the NTE date on the Data Control page to automatically get copied to the Hire NTE date (appointment expiration date) on the Employment 1 page for the following NOA codes: 115, 190, 108, 122, 171, 148, 149, 508, 515, 522, 548, 549, 571, 590, 760, 762, 765, 750 (the previous codes are used to trigger the setting of the Hire NTE Date field) and 512, 542, 524, 507, 520, 570, 546, 543, 546 (which are used to trigger the blanking out of the Hire NTE Date field). Be sure to continue to key the action and NOA code before keying the NTE date on the Data Control page. Prior to saving the action, be sure to validate that the Hire NTE date on the Employment 1 page has been populated accordingly.
- The security for CMS was loaded, specifically their user profiles and an updated department tree.
- An updated version of PAR Workflow was migrated to Production. The following items have been updated: routing limited by Row Security and Role to individual worklists, full 6-step workflow routing, 5-step routing option, Department ID added to worklist, ability to view status of actions at all levels, ability to update CAN code as 1st and 2nd Authorizers, pooled worklist for the Reviewer Role, and ability to initiate, save and re-access action as reviewer.
- The CIDB260 was updated for CMS’s purposes.
- A fix was applied to allow those assigned to the Agency Super User role access to view the handicap and ethnic group codes (RNO data).

- A series of public queries have been migrated to allow those individuals with access to run the queries. Please see the table below for detailed information about the queries.

EHRP Public Queries

Name	Purpose	Parameters	Data Provided
HE_POC_REPO RT	Provides information on the Help tickets logged in the Help Tracking Tool	<ul style="list-style-type: none"> • Set ID 	<ul style="list-style-type: none"> • Ticket Number • Open Date • Agency • Issue • Workaround / Resolution • Status • Status Date
