

Release Notes 1.7.1

10/21/02

The following items have been moved (migrated) to Production for use by Agencies beginning on October 21, 2002.

- Modifications were made for TSP processing.
 - As of 10/15/02, users will no longer need to key PAR actions on the Administer Workforce page group for some TSP actions. The following NOA codes will be inactivated; 963-0, 963-1, and 963-2. Users will only need to enter the TSP data on the Savings Plan page. The Payroll Interface will auto-generate the NOA's from the data on the Savings Plan page.
 - PROCESSING REMINDER: In order for the TSP Open Season processing to be accurate, HR must set the correct TSP Status Code and Status Date when entering Hires and Transfers.
 - Code was migrated for a TSP side process as well. If no actions have been initiated by the employee, the TSP side process will be executed to update the data with a new status code. The TSP side process will update the status code by evaluating the TSP SCD date, the employee's current status code and the employee's eligibility. The side process will run on 12/1/02. When the side process updates the Savings Plan page, it will insert a row with an effective date of 12/1/02 and the new status code and status date.
 - The Employee Express Inbound batch job has been modified so that no PAR rows will be inserted for the 963 actions.
 - Please see the TSP Postcard for complete details.

- The following pay table was updated in EHRP: 0116R.

- There were some incorrect Wage Grade pay tables identified for some IHS locations. The wage grade tables have been loaded and the employee records, positions and job codes have been corrected. Below is a list of locations with their correct Wage Grade pay table:
 - Shiprock 008R
 - Zuni 008R
 - San Carlos 008R
 - Crownpoint 008R
 - Tohatchi 008R
 - Sells 010R
 - Holton 056R
 - Pryor 083R
 - New Town 103R
 - Ada 109N
 - Anadarko 109N
 - Clinton 109N
 - Shawnee 109N
 - Carnegie 109N
 - Oklahoma City 109N
 - Wewoka 109N
 - Pawhuska 111N
 - Miami 111N
 - Ponca City 111N
 - Claremore 111N
 - Okmulgee 111N
 - Pawnee 111N
 - Tahlequah 111N
 - Lawton 138N
 - Haskell 080R
 - Toppenish 144R

- A number of NIH CRS AD pay plan employees were converted incorrectly into EHRP. A script was run to correct this error. The CRS AD pay plan employees should now be accurately represented by their Pay Table and Grade.
- The Comp Level field has been modified to accommodate a 4-character comp level code. The field has been modified both on the Position Data Page under Position Management and the Employment 2 page of the Employee Record.
- One modification was applied to the SF-50 generation program. The remarks on page 2 and beyond were previously printing too high and overlapping the description. This change causes the remarks on page 2 and beyond to print one line lower than on page 1. This extra line ensures that the overlap will not occur.
- Several changes were made to the Help PoC Tool.
 - The following Help POC Status codes have been added.
 - PAYC: Awaiting Payroll Confirmation
 - AGCY: Awaiting Agency Input/Action
 - FUNC: Pending Functional Research
 - TECH: Pending Technical Research
 - MREV: Awaiting Management Review
 - NOFA: Closed/No Further Action
 - The following Help POC Status codes have been inactivated:
 - NOAP: Not Approved
 - PEND: Pending System Investigation
 - PEPR: Pending Prioritization
 - OPEN: Open
 - The following Help POC Status codes have been changed:
 - POCR – Closed/ Help PoC Resolved
 - RDTP – Closed/Released to Production
